Table of contents

No. 1 1–232 issued on January 2, 1986
No. 2 233–484 issued on January 15, 1986
No. 3 485–676 issued on February 3, 1986

Acknowledgement to Referees 1– 5

Newsletter 1986 of the Nomenclature Committee of IUB (NC-IUB) and of the IUPAC-IUB Joint Commission on Biochemical Nomenclature (JCBN) 485–487

Nucleic acids, protein synthesis, and molecular genetics

Improved procedure for the isolation of a double-strand-specific ribonuclease and its application to structural analysis of various 5S rRNAs and tRNAs
M. Digweed, T. Pieler, D. Kluwe, L. Schuster, R. Walker and V. A. Erdmann 31– 39

Heat-shock protein synthesis in *Chlamydomonas reinhardi* – Translational control at the level of initiation of a poly(A)-rich-RNA coded 22-KDa protein in a cell-free system
K. Kloppstech and I. Ohad 63– 68

Distribution of tissue-specific tightly bound non-histone proteins in the first level of repeating chromatin structures
F. Altieri, P. Allegra, R. I. Lonigro, S. Scarpa and P. Caiafa 147–152

Sequence determinants of cytosolic N-terminal protein processing
C. Flinta, B. Persson, H. Jörnvall and G. von Heijne 193–196

Influence of 2-aminoadenosine, A', on the conformational behaviour of d(T-A'-T-A') – A one-dimensional proton NMR study at 300 MHz and 500 MHz
L. J. Rinkel, J.-R. Mellema, G. A. van der Marel, J. H. van Boom and C. Altona 259–265

Kinetic studies on ribosomal peptidyl-transferase – The behaviour of the inhibitor blasticidin S
D. L. Kalpaxis, D. A. Theocharis and C. Coutsogeorgopoulos 267–271

H1 variant synthesis in proliferating and quiescent human cells
M. D'Incalci, P. Allavena, R. S. Wu and W. M. Bonner 273–279

Salt-induced folding of sea urchin sperm chromatin
J. O. Thomas, C. Rees and P. J. G. Butler 343–348

Bovine DNA contains a single major family of interspersed repetitive sequences
K. K. Richardson, R. M. Crosby, P. J. Good, N. L. Rosen and J. E. Mayfield 349–354

Structural homology between elongation factors EF-Tu from *Bacillus stearothermophilus* and *Escherichia coli* in the binding site for aminoacyl-tRNA
J. Jonák, K. Pokorná, B. Meloun and K. Karas 355–362

Inhibition of adenovirus DNA replication *in vitro* by autoimmune sera
G. J. M. Pruijn, H. G. Kusters, F. H. J. Gmelig Meyling and P. C. van der Vliet 363–370

Transglutaminase-sensitive glutamine residues of human plasma fibronectin revealed by studying its proteolytic fragments
L. Fesus, M. L. Metsis, L. Muszbek and V. E. Koteliansky 371–374

Complete nucleotide sequence and genome organization of a *Drosophila* transposable genetic element, *297*
S. Inouye, S. Yuki and K. Saigo 417–425

Complete amino acid sequence of rat L-type pyruvate kinase deduced from the cDNA sequence
H. Inoue, T. Noguchi and T. Tanaka 465–469

Molecular cloning of cDNA for rat mitochondrial 3-oxoacyl-CoA thiolase
S. Miura, M. Takiguchi, H. Matsue, Y. Amaya, M. Tatibana, K. Shigesada, T. Osumi, T. Hashimoto and M. Mori 479–484

Nucleotide sequence of cloned cDNA specific for rat ribosomal protein L35a
T. Tanaka, K. Wakasugi, Y. Kuwano, K. Ishikawa and K. Ogata 523–527

Nucleotide sequence and transcription of the *fbc* operon from *Rhodopseudomonas sphaeroides* – Evaluation of the deduced amino acid sequences of the FeS protein, cytochrome *b* and cytochrome c_1
N. Gabellini and W. Sebald 569–579

Expression of the polyoma middle-size T antigen in *Escherichia coli*
K. Palme and W. Eckhart 581–585

The implication of a plastid-derived factor in the transcriptional control of nuclear genes encoding the light-harvesting chlorophyll *a/b* protein
A. Batschauer, E. Mösinger, K Kreuz, I. Dörr and K. Apel 625–634

Analysis of human p53 proteins and mRNA levels in normal and transformed cells
G. Matlashewski, L. Banks, D. Pim and L. Crawford 665–672

Protein chemistry and structure

Purification and complete primary structures of the heparin-, cell-, and DNA-binding domains of bovine plasma fibronectin
K. Skorstengaard, M. S. Jensen, T. E. Petersen and S. Magnusson 15– 29

Physicochemical characterization of the heat-stable microtubule-associated protein MAP2
M. A. Hernández, J. Avila and J. M. Andreu 41– 48

Analysis of oxygen binding to *Panulirus japonicus* hemocyanin – The effect of divalent cations on the allosteric transition
N. Makino 49– 55

Identification of regions of brome mosaic virus coat protein chemically cross-linked *in situ* to viral RNA
J.-Y. Sgro, B. Jacrot and J. Chroboczek 69–76

Preferential conformation of substance P in solution
G. Chassaing, O. Convert and S. Lavielle 77–85

Interactions of plasma gelsolin with actin – Isolation and characterization of binary and ternary plasma-gelsolin–actin complexes
F. Porte and M.-C. Harricane 87–93

Characterization of two murine monoclonal antibodies (P10, P12) directed against different determinants on human blood platelet thrombospondin
P. Clezardin, J. L. McGregor, M. Lyon, K. J. Clemetson and J. Huppert 95–102

The two alcohol dehydrogenases of *Zymomonas mobilis* – Purification by differential dye ligand chromatography, molecular characterisation and physiological roles
A. D. Neale, R. K. Scopes, J. M. Kelly and R. E. H. Wettenhall 119–124

Isolation, characterization, and N-terminal sequence studies of cuticular proteins from the migratory locust, *Locusta migratoria*
P. Højrup, S. O. Andersen and P. Roepstorff 153–159

Further characterization and amino acid sequence of m-type thioredoxins from spinach chloroplasts
K. Maeda, A. Tsugita, D. Dalzoppo, F. Vilbois and P. Schürmann 197–203

Incorporation of sulphate into type III procollagen by cultured human fibroblasts – Identification of tyrosine O-sulphate
A. Jukkola, J. Risteli, O. Niemelä and L. Risteli 219–224

Characterization of solubilized insulin receptors from rat liver microsomes – Existence of two receptor species with different binding properties
R. Koch, A. Deger, H.-M. Jäck, K.-N. Klotz, D. Schenzle, H. Krämer, S. Kelm, G. Müller, R. Rapp and U. Weber 281–287

Interaction of substance P with tubulin
R. B. Maccioni, J. R. Cann and J. M. Stewart 427–435

X-ray crystallographic and biochemical characterization of single crystals formed by proteolytically modified human fibrinogen
R. Gollwitzer and W. Bode 437–443

Completion of the primary structure of human high-molecular-mass kininogen – The amino acid sequence of the entire heavy chain and evidence for its evolution by gene triplication
J. Kellermann, F. Lottspeich, A. Henschen and W. Müller-Esterl 471–478

Characterization of a glucoamylase G2 from *Aspergillus niger*
B. Svensson, K. Larsen and A. Gunnarsson 497–502

The complete amino acid sequence of vitelline coat lysin
K. Haino-Fukushima, H. Kasai, T. Isobe, M. Kimura and T. Okuyama 503–510

Assignment of conserved amino acid residues to the ATP site in the protein kinase domain of the receptor for epidermal growth factor
S. Vogel, W. Freist and J. Hoppe 529–532

DNA-binding domains of human plasma fibronectin – pH and calcium ion modulation of fibronectin binding to DNA and heparin
A. Siri, E. Balza, B. Carnemolla, P. Castellani, L. Borsi and L. Zardi 533–538

Structural, immunological and kinetic comparisons of NADP-dependent malate dehydrogenases from spinach (C_3) and corn (C_4) chloroplasts
N. Ferte, J.-P. Jacquot and J.-C. Meunier

Purification and characterization of ovine angiotensinogen
R. T. Fernley, M. John, H. D. Niall and J. P. Coghlan 597–601

Enzymology

Detergent-solubilization, purification, and characterization of membrane-bound 3-hydroxy-3-methylglutaryl-coenzyme A reductase from radish seedlings
T. J. Bach, D. H. Rogers and H. Rudney 103–111

Phosphorylation of cGMP-dependent protein kinase increases the affinity for cyclic AMP
W. Landgraf, R. Hullin, C. Göbel and F. Hofmann 113–117

Isolation and properties of glycerol-3-phosphate oxidoreductase from human placenta
S. Żołnierowicz, J. Świerczyński and L. Zelewski 161–166

Mechanistic origin of the kinetic cooperativity of hexokinase type L_1 from wheat germ
G. Pettersson 167–170

Mitochondrial adenylate kinase (AK2) from bovine heart – The complete primary structure
R. Frank, M. Trosin, A. G. Tomasselli, L. Noda, R. L. Krauth-Siegel and R. H. Schirmer 205–211

Kinetics of thrombin-induced release and activation of platelet factor V
D. Baruch, H. C. Hemker and T. Lindhout 213–218

Isolation and properties of porcine lecithin:cholesterol acyltransferase
G. Knipping 289–294

The DNA sequence recognized by the *Eco*DXX1 restriction endonuclease
A. Piekarowicz and J. D. Goguen 295–298

The major isozyme of rat cardiac glutathione transferases – Its correspondence to hepatic transferase X
T. Ishikawa, U. Milbert, F. Oesch and H. Sies 299–305

Purification, crystallization and preliminary X-ray investigation of quinoprotein methylamine dehydrogenase from *Thiobacillus versutus*
F. M. D. Vellieux, J. Frank, Jzn, M. B. A. Swarte, H. Groendijk, J. A. Duine, J. Drenth and W. G. J. Hol 383–386

Purification of a hexaheme cytochrome c_{552} from *Escherichia coli* K12 and its properties as a nitrite reductase
S. Kajie and Y. Anraku 457–463

Lipopolysaccharide-sensitive serine-protease zymogen (factor C) found in Limulus hemocytes – Isolation and characterization
T. Nakamura, T. Morita and S. Iwanaga 511–521

Effects of putrescine on synthesis and degradation of ornithine decarboxylase in primary cultured hepatocytes
R. Kanamoto, K. Utsunomiya, T. Kameji and S. Hayashi 539–544

Reaction of cimetidine with Fenton reagent – A biomimetic model for the mixed-function oxidase drug metabolism
S. Zbaida, R. Kariv, P. Fischer, J. Silman-Greenspan and Z. Tashma 603–605

Purification and characterization of an inhibitor of plasminogen activator released by rat mammary adenocarcinoma cells
A. J. Grant, I. A. Ramshaw, P. Badenoch-Jones, R. D. Eichner and N. H. Hunt 635–641

The phosphate group of 3-phosphoglycerate accounts for conformational changes occurring on binding to 3-phosphoglycerate kinase – Enzyme inhibition and thiol reactivity studies
P. Tompa, P. T. Hong and M. Vas 643–649

Carbohydrates, lipids and other natural products

Chain length heterogeneity of lipo-polysaccharide released from *Salmonella typhimurium* by ethylenediaminetetraacetic acid or polycations
R. Hukari, I. M. Helander and M. Vaara 673–676

Physical biochemistry

Modulation of the interaction between the two halves of troponin C by the other troponin subunits
C.-L. A. Wang and J. Gergely 225–228

Laurate binding to human serum albumin – Multiple binding equilibria investigated by a dialysis exchange method
A. O. Pedersen, B. Hust, S. Andersen, F. Nielsen and R. Brodersen 545–552

Nuclear-magnetic-resonance studies on the conformation of membrane-bound α-mating factor – Transferred nuclear Overhauser effect analysis
K. Wakamatsu, A. Okada, M. Suzuki, T. Higashijima, Y. Masui, S. Sakakibara and T. Miyazawa 607–615

Membranes and bioenergetics

The dependence on internal pH of Ca^{2+}-fluxes across sarcoplasmic reticulum vesicular membranes
E. Fassold and W. Hasselbach 7–14

Induction of different isozymes of cytochrome P-450 and of microsomal epoxide hydrolase in rat liver by 2-acetylaminofluorene and structurally related compounds
A. Åström, W. Birberg, Å. Pilotti and J. W. DePierre 125–134

Metabolic incorporation of 9-(2-anthryl)-nonanoic acid, a new fluorescent and photoactivable probe, into the membrane lipids of Chinese hamster ovary cells
L. Dupou, J. Teissié and J.-F. Tocanne 171–177

Regulation of the chloroplast H^+-ATPase by light – The involvement of Mg^{2+} ions
Y. Shahak 179–185

Trehalase activation in yeasts is mediated by an internal acidification
E. Valle, L. Bergillos, S. Gascón, F. Parra and S. Ramos 247–251

Regulation and interconversion of the potassium transport systems of *Saccharomyces cerevisiae* as revealed by rubidium transport
J. Ramos and A. Rodríguez-Navarro 307–311

The effect of Mg^{2+} on hepatic microsomal Ca^{2+} and Sr^{2+} transport
C. R. Fleschner and N. Kraus-Friedmann 313–320

Thiol modification as a probe of conformational forms of the F_1 ATPase of *Escherichia coli* and of the structural asymmetry of its β subunits
H. Stan-Lotter and P. D. Bragg 321–327

The isolation of plasma membrane and characterisation of the plasma membrane ATPase from the yeast *Candida albicans*
M. J. Hubbard, R. Surarit, P. A. Sullivan and M. G. Shepherd 375–381

The phospho*enol*pyruvate-dependent fructose-specific phosphotransferase system in *Rhodopseudomonas sphaeroides* – Energetics of the phosphoryl group transfer from phospho*enol*pyruvate to fructose
J. S. Lolkema, R. H. ten Hoeve-Duurkens and G. T. Robillard 387–393

Membrane electrogenesis and sodium transport in filamentous nitrogen-fixing cyanobacteria
S. K. Apte and J. Thomas 395–401

Tetanus toxin receptors on nerve cells contain a trypsin-sensitive component
E. Yavin and A. Nathan 403–407

Botulinum neurotoxin type B – Its purification, radioiodination and interaction with rat-brain synaptosomal membranes
D. M. Evans, R. S. Williams, C. C. Shone, P. Hambleton, J. Melling and J. O Dolly 409–416

Rhodamine 6G inhibits the matrix-catalyzed processing of precursors of rat-liver mitochondrial proteins
S. Kuzela, V. Joste and B. D. Nelson 553–557

Functional incorporation of beef-heart cytochrome *c* oxidase into membranes of *Streptococcus cremoris*
A. J. M. Driessen, W. de Vrij and W. N. Konings 617–624

The phospho*enol*pyruvate-dependent fructose-specific phosphotransferase system in *Rhodopseudomonas sphaeroides* – E_{II}^{Fru} possesses a Zn^{2+}-binding site and a dithiol/disulfide redox centre
J. S. Lolkema, R. H. ten Hoeve-Duurkens and G. T. Robillard 651–656

Cellular biochemistry and metabolism

Developmental regulation of glycosyltransferases involved in biosynthesis of asparagine-linked glycoproteins in mouse mammary gland
I. K. Vijay and T. Oka 57–62

Isolation of a domain of villin retaining calcium-dependent interaction with G-actin, but devoid of F-actin fragmenting activity
L. K. Hesterberg and K. Weber 135–140

Effect of benzoate on the metabolism of fructose 2,6-bisphosphate in yeast
J. François, E. Van Schaftingen and H.-G. Hers 141–145

Metabolism of phosphatidyl-dCMP in sarcoma 180 cells – Effect of chlorpromazine, phosphatidic acid and inositol
S. Iujvidin and J. Mordoh 187–192

An 100-kDa Ca^{2+}-sensitive actin-fragmenting protein from unfertilized sea urchin egg
H. Hosoya, I. Mabuchi and H. Sakai 233–239

Interaction of guanidinium and guanidinium derivatives with the Na^+/H^+ exchange system
C. Frelin, P. Vigne, P. Barbry and M. Lazdunski 241–245

Polyamines stimulate the phosphorylation of phosphatidylinositol in membranes from A431 cells
S. Vogel and J. Hoppe 253–257

Post-proline dipeptidyl-aminopeptidase from synaptosomal membranes of guinea-pig brain – A possible role for this activity in the hydrolysis of His-ProNH_2, arising from the action of synaptosomal membrane pyroglutamate aminopeptidase on thyroliberin
B. O'Connor and G. O'Cuinn 329–335

The phospho*enol*pyruvate:glucose phosphotransferase system of *Salmonella typhimurium* – The phosphorylated form of III^{Glc}
S. O. Nelson, A. R. J. Schuitema and P. W. Postma 337–341

Studies on the turnover of glucocerebrosidase in cultured rat peritoneal macrophages and normal human fibroblasts
P. K. Das, G. J. Murray and J. A. Barranger 445–450

Biphasic Ca^{2+} response of adenylate cyclase – The role of calmodulin in its activation by Ca^{2+} ions
T. J. Resink, S. Stucki, G. Y. Grigorian, A. Zschauer and F. R. Bühler 451–456

Enzymatic basis for the calcium-induced decrease of membrane protein methyl esterification in intact erythrocytes – Evidence for an impairment of *S*-adenosylmethionine synthesis
P. Galletti, D. Ingrosso, P. Iardino, C. Manna, G. Pontoni and V. Zappia 489–495

Leukotriene C_4 metabolism by hepatoma cells deficient in the uptake of cysteinyl leukotrienes
G. Weckbecker and D. O. R. Keppler 559–562

Isolation of the low-molecular-mass form of catechol *O*-methyltransferase from rat liver and immunocytochemical localization of the enzyme in the glycogen compartment
J. Veser and R. Martin 657–663

Developmental biochemistry and immunology

Ion fluxes changes during early stages of *Schistosoma mansoni* – Evaluation of complement effect
R. Tarrab-Hazdai, R. Sagi-Eisenberg, V. Brenner and R. Arnon 563–568

Correspondence

Comments on 'The activation of adenylate cyclase from small intestinal epithelium by cholera toxin', by P. Domínguez, F. Barros and P. S. Lazo
D. A. Stansfield
